FUYL Tower™ 5 or 15

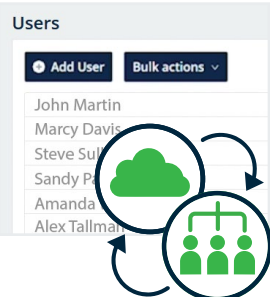

A complete hardware and software solution to efficiently charge, store, secure and manage workflow for mobile devices.

Smarter mobile device management for any workflow.

- Check In/Out
- Break/Fix
- Shared Devices
- Loaner Devices
- Public Charging

Automate manual processes for managing mobile devices to reduce wasted time, minimize device downtime, maintain devices with zero human interaction, provide secure charging on demand and much more.

Manage User Access to Towers with External Directory Integration.
Integrating your organization's Active Directory, Google Workspace*, or other LDAP-compatible directory simplifies and centralizes Admin control of user access to FUYL Towers. This integration enhances security, allows for faster setup and offers easier maintenance of Tower users and user group(s). If you prefer not to integrate, a built-in User Directory is also available to manually add and manage users.

Securely Charge and Store Devices so They're Always Ready for Use.
All bays contain a power outlet and a 2.4 amp USB port so you can securely charge almost any device, including: iPads, tablets, laptops, mobile phones, Chromebooks and more.¹

Manage Multiple Towers from One Centralized, Web-Based Portal.
Give designated admins detailed access to view and manage any number of Towers. Efficiently manage Towers by cascading settings to multiple Towers, groups of Towers or groups of users with "bulk operations", "station groups" and "user groups".

Integrate LocknCharge Cloud with External Systems. Take device management to the next level. Using Cloud API and webhooks, LocknCharge Cloud can be integrated into external and/or existing IT infrastructure.
